

JOHNSON & JOHNSON  
NEW BRUNSWICK, NEW JERSEY

**Johnson & Johnson** manufactures health care products for the consumer, pharmaceutical, and professional markets. The company demonstrated its commitment to environmental stewardship by implementing a Pollution Prevention Goals program in 1991. Significant achievements under the program include a company-wide 19% reduction in hazardous waste generation, a 21% reduction in energy use, a 68% reduction in solid waste disposal, and a 61% reduction in office paper use. Moreover, Johnson & Johnson committed to further reducing solid waste generation, water use, raw material use, and carbon dioxide emissions by 2003. A total of 50 facilities, including the corporate headquarters participate in Performance Track.

**AT A GLANCE**

Industry Sector:	Soap, Cosmetics, and Hygiene
Business:	Manufactures health care products
Facility Employees:	More than 1,000
Accomplishments:	Reduced energy consumption Reduced package material use
2003 Commitments:	Reduce air emissions Reduce raw material use Reduce water use Reduce solid waste
Address:	One Johnson & Johnson Plaza New Brunswick, NJ 08933
Web Site:	<a href="http://www.jnj.com">www.jnj.com</a>

## ENVIRONMENTAL PERFORMANCE

### *Past Accomplishments*

Johnson & Johnson has demonstrated its commitment to environmental performance in the areas of energy reduction and reduced packaging material use. Since 1997, the company has:

- **Reduced energy consumption** by 12% through improved management practices.
- **Reduced packaging material use** by 25% through reducing packaging sizes, eliminating packaging components, and reusing packaging.

### *Future Commitments*

Johnson & Johnson also committed to continued environmental improvement through additional reductions in air emissions and solid waste generation, as well as reductions of raw materials and water use. All participating facilities will conduct the following actions through 2003:

- **Reduce emissions of carbon dioxide** by 2% through improving management practices and using different energy sources.
- **Reduce raw material use** by 5% through improving production efficiency.
- **Reduce water use** by 5% through implementing water conservation practices.
- **Further reduce solid waste generation** by 5% through improving production efficiency.

## COMMUNITY OUTREACH

Johnson & Johnson informs the public of important environmental matters through community meetings, public forums, phone inquiries, and press releases to the news media. Company representatives also participate in the local emergency planning committee, which develops plans to communicate, educate, and protect the public in the event of a chemical release. In addition, the facility publishes an environmental newsletter and an annual environmental, health, and safety report, which is available via its Web site. The facility will also make the Performance Track Annual Report available through its Web site.
